- Q. Please describe Pankrac prison as completely as possible to show physical layout, guards and security types of prisoners (political or criminal) and its location within the city.
- A. Pankrac prison is located in the Pankrac district of Prague. More specifically, it is situated near the highway leading to Tabor and Vienna, and can be reached by car in 10 to 15 minutes from Wenceslas Square. It consists of a large complex of four to five-story buildings and is connected with the new criminal court building. The entire complex is surrounded by a wall at least 20 feet high. There are many trees just inside the wall and an additional barbed wire enclosure inside the wall. Although I do not remember any details, I believe that the various buildings stand free, although some may be connected by low passages. At least one of the buildings was L-shaped, and executions took place on the inner corner of this building. I am unable to furnish any additional data.
